"**Dennis Marcellino has the answer.** Actually, with an education that ranges from science and engineering to theology and psychology, Marcellino has **many answers**. But in his new book, *Why Are We Here?*, he chooses to answer the one question that has puzzled intellectuals for centuries."

"In using science to explore what is usually an emotionally charged subject, Marcellino provides a strong fact-based philosophical approach which is **compelling**."
Diane Donovan, The Philosopher's Bookshelf,
